Summary

Frontend Engineer focused on building production-ready applications using React, React Native, and Next.js. Experienced in API integration, state management, and shipping end-to-end product features with emphasis on performance and clean UI.

Skills

Frontend React.js • Next.js • React Native • TypeScript • JavaScript • Tailwind CSS • NativeWind

State/UI Redux Toolkit • Zustand • TanStack Query • Shadcn UI • Mantine UI

Backend Node.js • Supabase • Prisma • PostgreSQL • REST APIs

Tooling Nx Monorepo • Git • Vite • Vercel • Figma

Experience

Envo

Aug 2025 – Present

Frontend Engineer · Remote

- Owned and shipped frontend features for an AI-powered mobile application using React Native, TypeScript, and Supabase.
- Implemented onboarding flows, API integrations, and real-time data-driven UI.
- Contributed to backend workflows including schema updates and RPC functions.
- Built dashboards and landing pages using React and Next.js.

Studio 137

Jun 2025 – Aug 2025

Frontend Engineer · Remote

- Built responsive production UIs using React, TypeScript, and Tailwind CSS.
- Implemented Redux-based state management for complex workflows.
- Integrated APIs and optimized data fetching using TanStack Query.

Tukidoo.ai

Jan 2025 – Jun 2025

Frontend Intern · Remote

- Built full frontend (admin panel, landing page, core app) using Next.js and Tailwind CSS.
- Integrated REST APIs and improved cross-device performance.

Projects

Good For Us — AI Ingredient Scanner

[Live](#)

- Built an AI-powered mobile app using React Native, Supabase, and Gemini AI.
- Implemented personalized health scoring based on onboarding inputs.
- Designed frontend architecture and handled real-time data rendering.

ImageLayoutBuilder — Canvas Layout Editor

[Live](#)

- Built a canvas editor using Konva.js with real-time interactions.
- Implemented Redux-based state management with undo/redo and layering.
- Designed system for drag, resize, rotate, and element manipulation.

Token Portfolio — Crypto Dashboard

[Live](#)

- Built a dashboard for tracking crypto holdings and live prices.
- Used Redux Toolkit and React Query for state and API optimization.
- Integrated wallet connection and local persistence.

Education

B.Tech in Electronics and Communication

2021 – 2025

Rewa Engineering College
